Health Records and Immunizations

IUPUI requires proof of the following immunizations:

- Tetanus, Diphtheria, Pertussis (Tdap vaccine).
- Measles, Mumps, Rubella (MMR vaccine),
- Varicella (Chickenpox),
- Meningitis - ACWY vaccine

**To verify your medical records, log into One.iu.edu with your IUPUI University Username and Passphrase. Type 'Immunization' into the search box.**

Click on the 'Immunization Compliance' icon that appears. Click the green start button and follow the directions **

Enter the dates you received the above vaccinations, upload your document proving you had a TB test in the US and submit.

If you have not already received these vaccinations, our Campus Health Services does offer and administer these once you arrive at IUPUI.

Students in health-related programs which include patient care may be required to show proof of immunizations to their academic department. Please check with your department for details.

It is advisable to bring any current medications as well as any medical records that you might need during your stay in the United States, especially if you have any serious health conditions. If a U.S. medical doctor will need to see your records shortly after arrival in the U.S., make sure the records are in English, or obtain a translation.

**Tuberculosis (TB) Screening**

All incoming international students are required to undergo and submit proof of a tuberculosis (TB) screening after arrival at IUPUI and within five weeks of your first semester. TB screening will be administered by IUPUI Campus Health.

You may also submit records of a U.S. based screening result. More information can be found on the Student Health webpage.
