Herron School of Art and Design actively builds upon its tradition of direct international engagement by students and faculty and expands the internationalization opportunities through a variety of activities.

Herron currently sends between 35 and 48 students on faculty-led study abroad programs to various destinations in Europe and Asia during spring breaks and summer months.

By 2021, every undergraduate student in a Herron degree program has had at least one experience in which they engaged within an international context.
